LIQUID CHLORINE (Cl-Cl)

Chlorine is hazardous gas, heavier than water and air. It is used for water treatment, paper whitening, plastics and formulating disinfectants.

Liquid Chlorine Packaging

- Cylinders 100 Kg
- Cylinders 1000 Kg

CALCIUM CHLORIDE (CaCl₂)

Calcium Chloride has several common applications such as fluid additive in drilling operations, brine for refrigeration plants, ice and dust control on roads and in cement.

Calcium Chloride Packaging

- 1 MT Jumbo Bag
- 25 Kg Bag

SODIUM SULPHATE (Na₂SO₄)

Sodium Sulphate (also known as Glauber's salt or sulphate of soda) is a white powder material used in the production of kraft paper, textile industry, glass manufacturing and in detergents.

Sodium Sulphate Packaging

- 50 kg bags

LABSA (96%)

Linear Alkyl Benzene Sulphonic Acid or LABSA is most commonly used surfactant on the global scale. It is widely used in household detergents as well as for industrial applications.

LABSA Packaging

LABSA is available in

- 35 KG Carboys
- 215 KG HDPE drums
- Bulk (20-30) MT

SLES (70%)

Sodium Lauryl Ether Sulfate (SLES) is an anionic surfactant widely used in personal care products such as shampoos, toothpaste, body wash, cosmetics and hand wash. SLES is also used as a very effective and inexpensive foaming agent, especially in industrial applications.

SLES Packaging

- SLES is available in 160 KG HDPE drums.

SCAN ME

CAUSTIC SODA (NaOH)

Caustic Soda is a strong base. It is a basic industrial chemical used in textile finishing, soap and detergents, paper and pulp, oil and gas etc.

Ittehad Chemicals produces Caustic Soda in the form of **Liquid (31% and 50% concentration)** and **Flakes (98%± 1)**. In flakes form, it is hygroscopic and as such readily absorbs water from the air.

Caustic Soda Packaging

- Caustic Soda Flakes 25 KG Bag
- Caustic Soda Liquid Tanker (20-30) MT

SODIUM HYPOCHLORITE (NaOCl)

Sodium Hypochlorite is commonly referred as liquid bleach. It is used for wide range of applications where its powerful disinfection and oxidation properties are utilized to deliver technical and commercial advantages.

Sodium Hypochlorite Packaging

- Tanker (10-30) MT

HYDROCHLORIC ACID (HCl)

Hydrochloric acid is a strong acid having multiple industrial applications.

Hydrochloric acid is an important laboratory reagent and industrial chemical with wide variety of applications. It is used in Dyestuffs, Gelatin, Metal industries, PVC, Synthetic rubber etc.

Hydrochloric Acid Packaging

- Tanker (20-30) MT
